Naveen Menan N S

Bangalore, India | naveenmenan2014@gmail.com | linkedin.com/in/naveenmenan

Data Engineer with **6+ years** of experience in **Snowflake, Oracle PL/SQL, AWS and Pentaho ETL**. Skilled in **cloud migration, data transformation, data governance, data quality**, and **Snowflake Cortex AI agents**.

EXPERIENCE

Dassault Systèmes, Software Developer | Data Engineer, Bangalore, India — Aug 2020 – Present

- Contributed to the **Oracle (RDBMS) to Snowflake cloud migration** (**Collaborator Award**), personally migrating **schemas, data, stored procedures, and validation logic**; optimized **Oracle PL/SQL** queries.
- Helped migrate **Pentaho ETL code** (Informatica-equivalent) to **Snowflake SQL** and data pipelines.
- Built a **Snowflake Cortex agent** that analyses and fetches **data lineage and metadata**, using **Cortex Analyst, Cortex Search, semantic views, and stored procedures**.
- Engineered an **AWS pipeline** (**Java, Step Functions, Kinesis, S3, Snowflake**) for ingestion and reporting.
- Implemented **data quality checks, automated error handling, and production troubleshooting** across ETL workflows for **reliability**.
- Designed scalable **ETL workflows** into a centralized **Data Warehouse**; partnered with **business stakeholders** on specs and documented **data architecture**.
- Built deployment **automation** with **GitHub Actions (CI/CD)**, using **GitHub** for version control; supported teammates building **Grafana dashboards**.
- Developed a generic **shell script** that runs database operations through **Maven** commands (**JDBC**) for **data fixes (DML)** and **resuming data pipelines**.
- Debug production issues on **AWS EC2** using **UNIX**; Followed in **Agile/Scrum** ceremonies and track work in **JIRA Cloud**.

PROJECTS

ODM Productization, Champion Award

- **Lower cost:** infrastructure cost cut from **∼$115k to ∼$35k per month (60%+ reduction)**.
- **Lower latency:** pipeline latency reduced from **30–5,790 min to 5–180 min**.
- **Faster onboarding:** enabled **billion-record** customer datasets the legacy model could not onboard.
- Built a new component to generate legacy **UUIDs**, reducing dependency on legacy UUID generator code.

AI-Powered ODM Lineage Chatbot, Hackathon

- **Self-service analytics: Snowflake Cortex Agent** (text-to-SQL) answers lineage and impact questions in English.
- **Full pipeline map:** auto-cataloged **metadata** for **2,400+ tables/views** and **∼850 procedures** of a **110B+ row** pipeline.
- **Data governance & security:** a second agent queries clinical-trial data via **secure views** with **role-based access** and audit logs.
- **Leadership:** led the project, mentored the team, and built **data sanity tools in Snowflake**.

SKILLS

Databases & SQL: Oracle (RDBMS), PL/SQL, Snowflake SQL, Query Optimization, Stored Procedures, Data Migration, Data Reconciliation

Snowflake & AI: Cortex Analyst, Cortex Search, Semantic Views, AI Agents, Data Lineage, Snowpipe, Data Governance, Metadata

ETL & Pipelines: Pentaho (Informatica-equivalent), ETL Modernization, Data Quality, Error Handling

Cloud: AWS (S3, DynamoDB, RDS, EC2, Step Functions, Kinesis, ECR, IAM, Glue/Iceberg)

DevOps & Monitoring: GitHub Actions, GitHub, CI/CD, Grafana, JIRA Cloud, Production Support

Languages & Practices: SQL, PL/SQL, Java, Python, UNIX, Shell Scripting, Agile/Scrum, Performance Tuning, Data Security

EDUCATION

Amrita Vishwa Vidyapeetham, B.Tech, Mechanical Engineering, March 2020
Coimbatore, India | CGPA: 8.78 / 10.0
